Embed a Streaming Video in D2L
Last Updated 9/1/2017.

1: Find a streaming video in our databases
You can find our current streaming video collections on the Databases A-Z list under Audio & Video. Our top vendors for streaming content include Films on Demand, Kanopy, and Alexander Street.

Step 2: Copy the embed code on Films on Demand videos
   a. Select the Embed/Link option beneath the video. A box with the permalink and embed code will appear.
   b. Copy the Embed Code.

Step 2: Copy the embed code on Kanopy videos
   a. Select the Share option beneath the video. A box with the permalink and embed code will appear.
   b. Select the Embed tab.
   c. Copy the code in the Embed this video textarea.

Step 2: Copy the embed code on Alexander Street videos
   a. Select the Embed/Link option beneath the video. A popup box with the permalink and embed code will appear.
   b. Copy the Embed code.
Step 3: Use the Insert Stuff icon in the toolbar to add an embed code to a news or discussion post in D2L

Step 4: Select Enter Embed Code from the popup menu

Step 5: Paste the embed code into the textarea

Step 6: Click Next to preview your embedded video
Step 7: Click Insert to add the video to your post

Step 8: Save/Update your post and you're done!

Important Tip:
Make sure the URLs for Films on Demand and Alexander Street videos start with the proxy URL. The proxy URL is required to enable off campus access to most streaming videos. Kanopy is an exception.

Proxy URL:
https://link.uwsuper.edu:9433/login?url=
